

*Cont*  
*A 2*

having a fold line about which the integral composite image product may be folded;--

Please replace the paragraph beginning on page 4, line 10 with the following rewritten paragraph:

*Sub. B7>* --a support substrate having a separate image layer thereon, the support substrate having a plurality of fold lines about which the image product may be folded; and--

*A 3*

Please replace the paragraph beginning on page 4, line 13 with the following rewritten paragraph:

*A 4*

--an attachment section integrally formed with the substrate.--

*Please cancel claims 35 - 43.*

Please amend claims 12, 13, 14, 21, 34, 45 and 47 as set forth below.

*Sub. B9>*

12.(Once Amended) A dual sided folded image product according to claim 11 wherein of said side sections having an end that is substantially about each other.

*A 5*

13.(Once Amended) A dual sided folded image product according to claim 12 further comprising a fold line disposed substantially co-extensive with a line formed by said ends of said side sections.

14.(Once Amended) A dual sided folded image product according to claim 11 wherein each of said side sections having an end which overlaps each other.

*A 6*

21.(Once Amended) A dual sided integral composite image product according to claim 20 wherein said integral composite image product has a plurality of fold lines.

A7

34.(Once Amended) An image product according to claim 33 wherein at least one scored line is provided on said leaf in association with said opening for allowing the leaf to be installed or removed from said ring.

A8

Sub B<sup>15</sup> 45.(Once Amended) An integral composite image product, comprising:

a first support substrate;  
a second support substrate having separate image layer thereon, said second support substrate being secured to said first support substrate so as to form said integral composite image product; said integral composite image product having a fold line about which said integral composite image product may be folded;  
an attachment section integrally formed with said first and/or second substrate.

A9

Sub B<sup>16</sup>

47.(Once Amended) A image product, comprising:  
a support substrate having a separate image layer thereon, said support substrate having a plurality of fold lines about which said image product may be folded; and  
an attachment section integrally formed with substrate.
